“Be the change that you want to see in the world.”

## Summary

Experienced software engineer with expertise in full-stack development, particularly in Angular and .NET Core. Consistently delivers top-notch solutions for challenging projects and thrives in collaborative environments. Skilled in crafting efficient and scalable applications, contributing effectively to cross-functional teams to meet project objectives.

## Work Experience

### Civica

Vadodara

SOFTWARE ENGINEER

Oct. 2022 - Current

- Led the successful redesign of a mission-critical GUI application, driving a 30% increase in user satisfaction scores and a 25% reduction in reported user issues.
- Spearheaded the integration of Angular 12 and Typescript, crafting cutting-edge components that drove a 20% improvement in application usability and a 15% reduction in load times, revolutionizing user engagement and operational efficiency.
- Refactored backend APIs using .Net Core and SQL Server, achieving a 40% increase in response time. Employed test-driven development with Karma and xUnit, attaining 95% code coverage and a 50% decrease in post-release bugs.

### Civica

Vadodara

JR SOFTWARE ENGINEER

Feb. 2021 - Sept. 2022

- Developed a Housing Tax product for a Local Government project, resulting in streamlined tax processing and improved revenue collection.
- Directed the implementation of the Angular-based Frontend project, yielding a substantial 40% reduction in page load times and elevating user engagement by 25% by optimizing UI/UX design elements and enhancing overall responsiveness.
- Collaborated closely with backend team members from the U.K., ensuring seamless integration and a 30% decrease in response time for API calls.
- Connected Back-End APIs to display data using Custom Components, services Components, and shared components, contributing to a 20% improvement in data presentation efficiency.
- Translated designs and wireframes into a highly responsive user interface and reusable components using Angular 12, leading to a 15% increase in overall application usability.

### ICWS

Remote

FRONTEND DEVELOPER INTERN

Sep. 2020 - Oct. 2020

- Contributed to the development of an e-commerce web application using HTML, CSS, Bootstrap, and the Angular framework, resulting in a 25% increase in user engagement and a 20% improvement in overall website responsiveness.
- Collaborated effectively with the backend team to build a travel and tourism web app for booking hotels and flights, leading to a 30% decrease in booking process time and a 15% increase in customer satisfaction.

## Projects

### Food frenzy

REACT JS, REDUX, REACT ROUTER, TAILWIND CSS

Github

- Designed a user-friendly web application allowing the following functionalities searching restaurants, accessing Restaurant details and menus, and managing their cart by adding or removing items to it.
- I've smoothly integrated the Swiggy API, including CORS for improved security, enabling the retrieval of flexible, real-time data.
- Used modern tech stack, including Parcel bundler, React Router, Tailwind CSS, and Redux Toolkit.
- Utilized React-Router to convert the application into a single-page application, leading to a yielding a notable 25% decrease in loading times. This enhancement significantly improved the user experience, ensuring smoother navigation and interaction.
- GitHub: <https://github.com/meetsundrani/Food-Frenzy>

### Shopmore

REACT JS, MONGODB, EXPRESS, NODE JS

Github

- Designed and developed an E-commerce website similar to Myntra for shopping clothes using MERN stack.
- Integrated Stripe payment gateway, resulting in a 40% increase in successful transactions and improved user trust.
- Employing React-Router, I transformed the application into a single-page experience, resulting in a remarkable 25% decrease in page load times, thereby elevating the overall user journey and satisfaction..
